Number 32

Arizona State Fish: **Apache trout**

The **Apache trout** is yellow with dark spots and lives in cold mountain streams, where it feeds on insects and small fish.

7

Arizona State Bird: **Cactus wren**

The **cactus wren** is brown, with a white stripe above its eye, and a dark throat. It builds its nests in cacti and thorny trees.

5

Arizona State Mammal: **Ringtail**

The **ringtail** is mostly grey, with a light belly. Like its relative the raccoon, it has a dark face mask and black rings around its tail.

2

Directions: Write your name on the line on the cover page. Color the pictures. Cut along the dotted lines. Fold each strip in half so that you see one picture on each page. Make sure that the cover is on the front and the pages are in the correct order. Then, staple your booklet together.

Arizona is a wonderful place to live, with many different kinds of plants and animals.

A few special plants and animals have been named as **Arizona State Symbols**.

These plants and animals were chosen by students from all over Arizona and were approved by the Legislature.

Other states have state symbols, too. After reading about Arizona's state symbols, do some research to learn about the state symbols of some other states.

1

Arizona State Reptile: Arizona ridgenosed rattlesnake

The **ridgenosed rattlesnake** is reddish brown and has white stripes on its face. It gets its name from its turned up nose.

6

Arizona State Butterfly: Two-tailed swallowtail

The **two-tailed swallowtail** butterfly is bright yellow, with blue spots at the bottom of each wing. It has two "tails" on each lower wing.

3

Arizona State Amphibian: Arizona treefrog

The **Arizona treefrog** is mostly green with a dark stripe on each side of the body. Pads on its toes make this frog a good climber.
